

Setting Charging times in the EcoFlow app

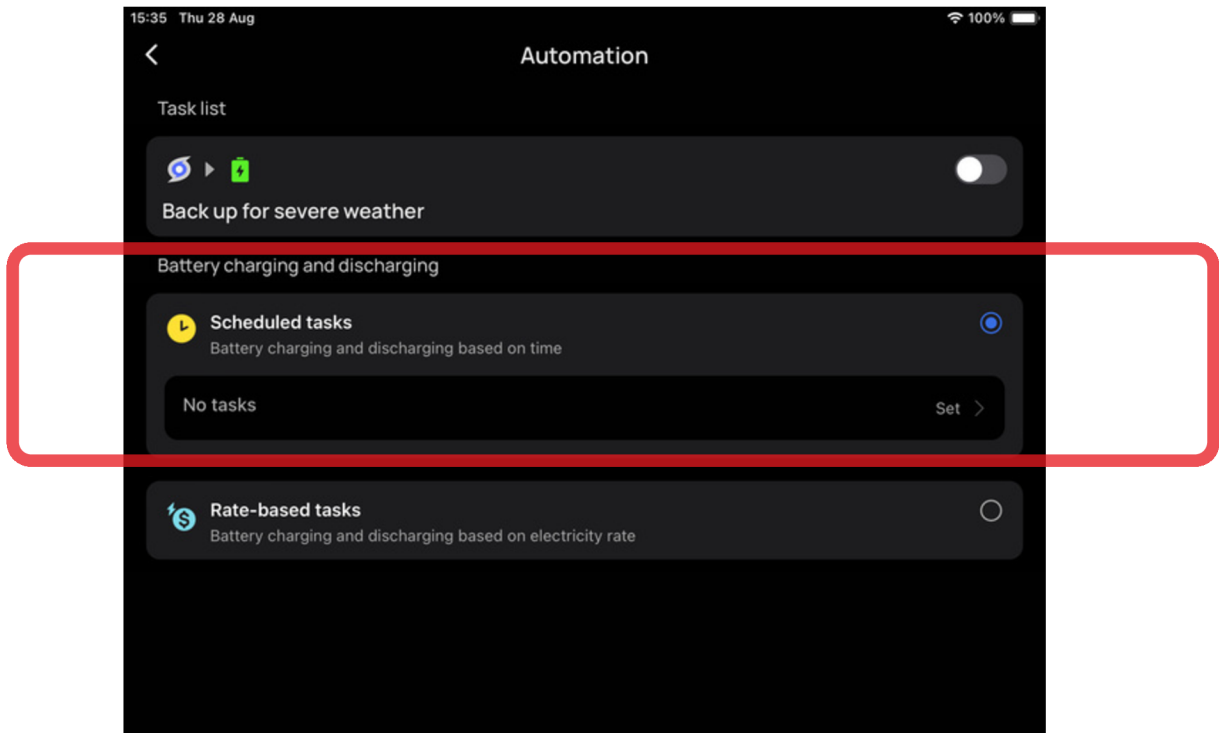

1. Open the EcoFlow app
2. Select "Automation" at the bottom of the screen

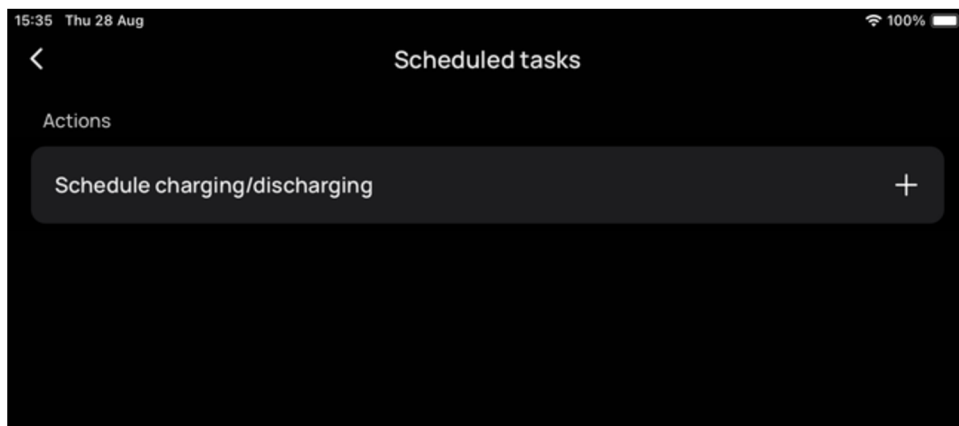

3. Click on "Battery charging and discharging"

4. Click "Scheduled tasks"

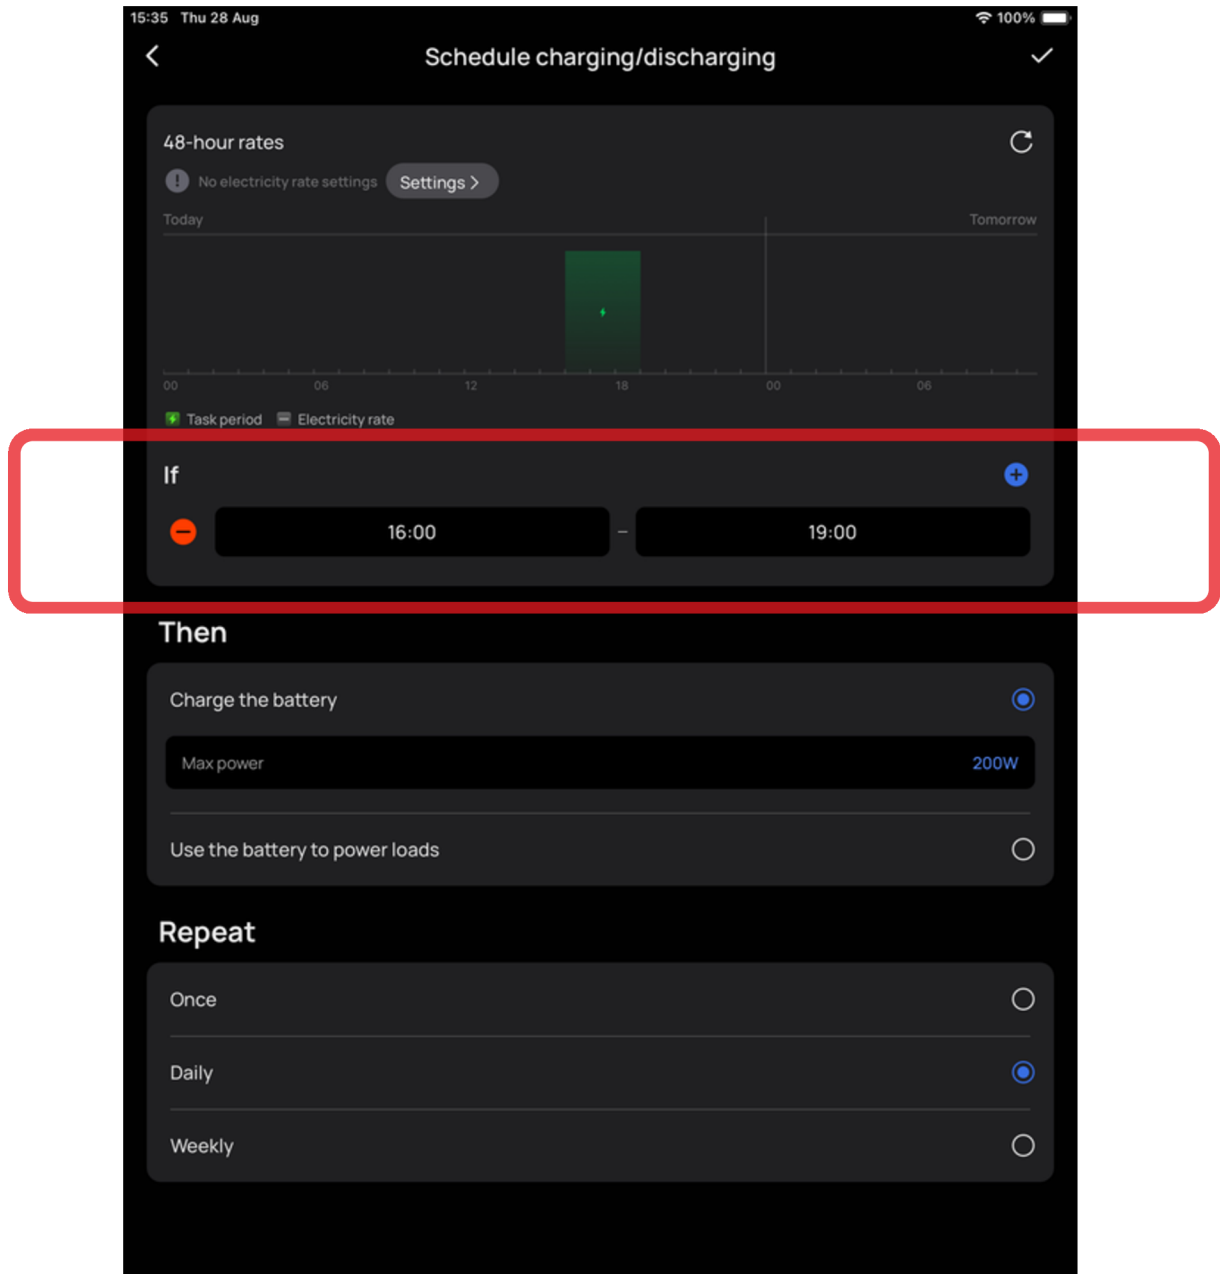

5. Click "Scheduled charging/discharging"

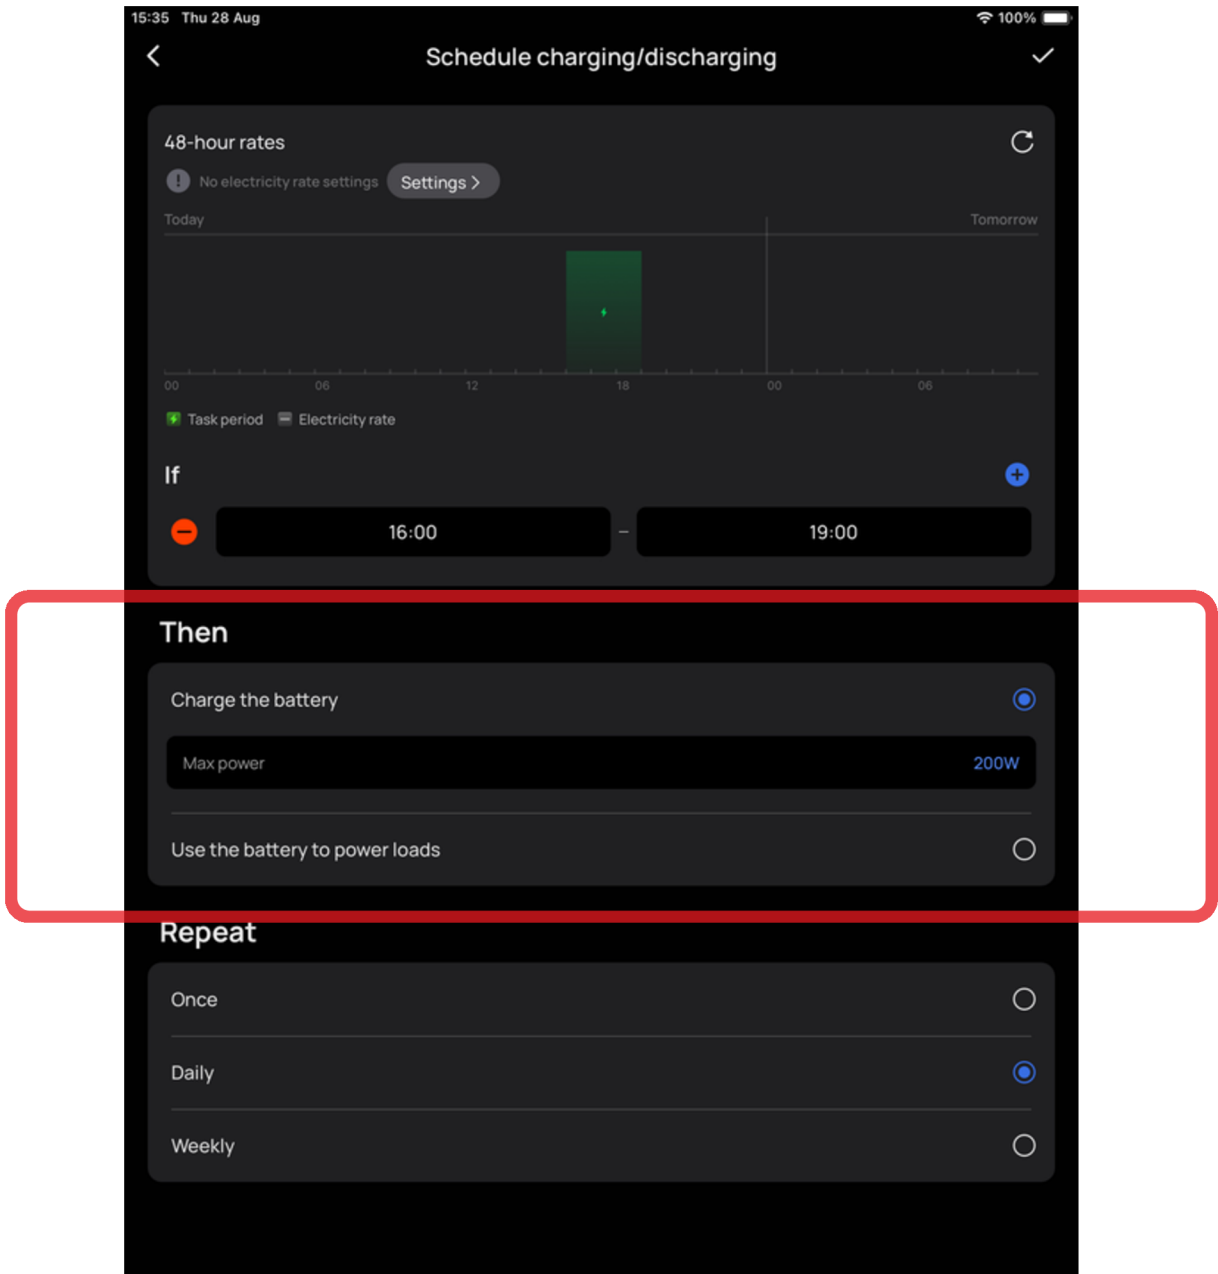

You should then be brought to the page below :

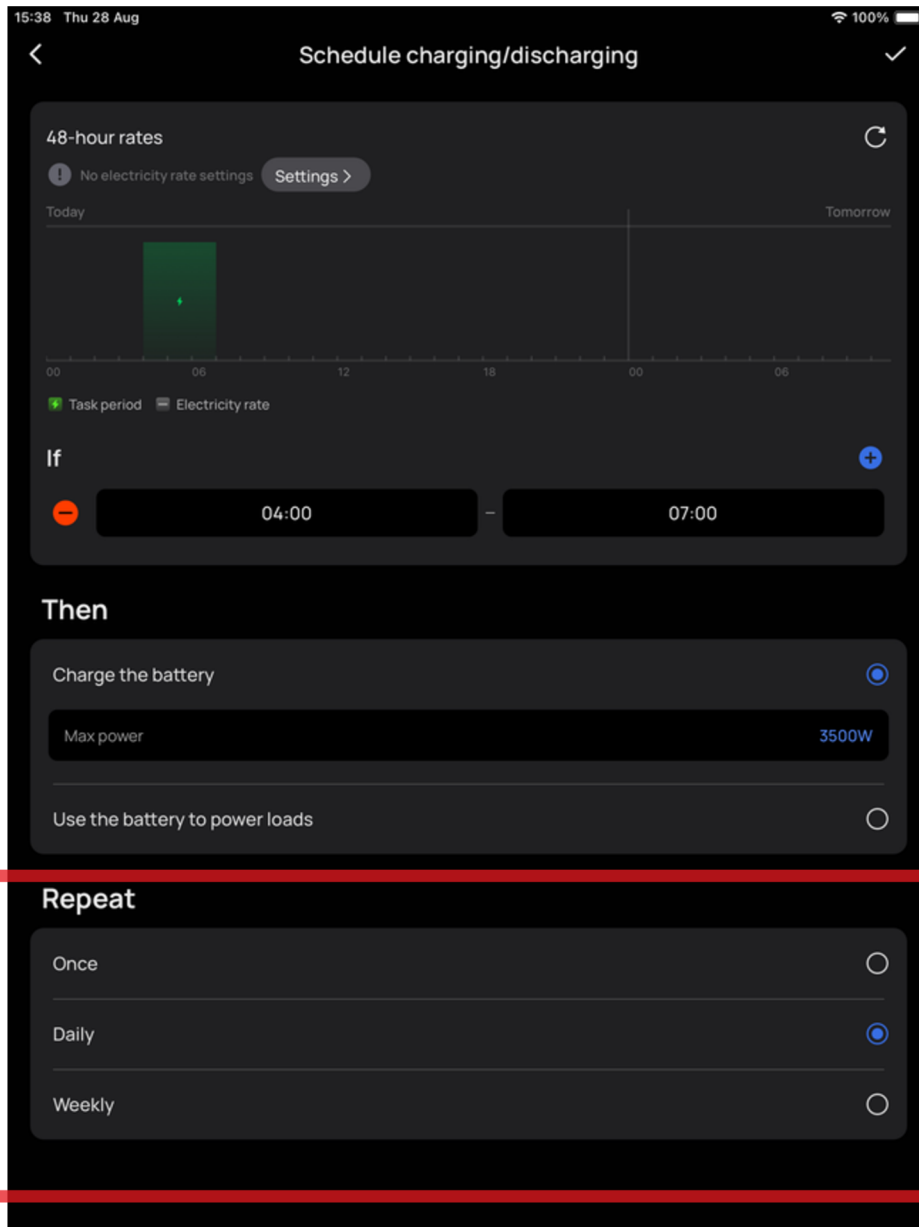

6. Set the time slot you want to charge your batteries at by clicking the area circled in red. If you want to add multiple charging time slots then please click the blue plus button.

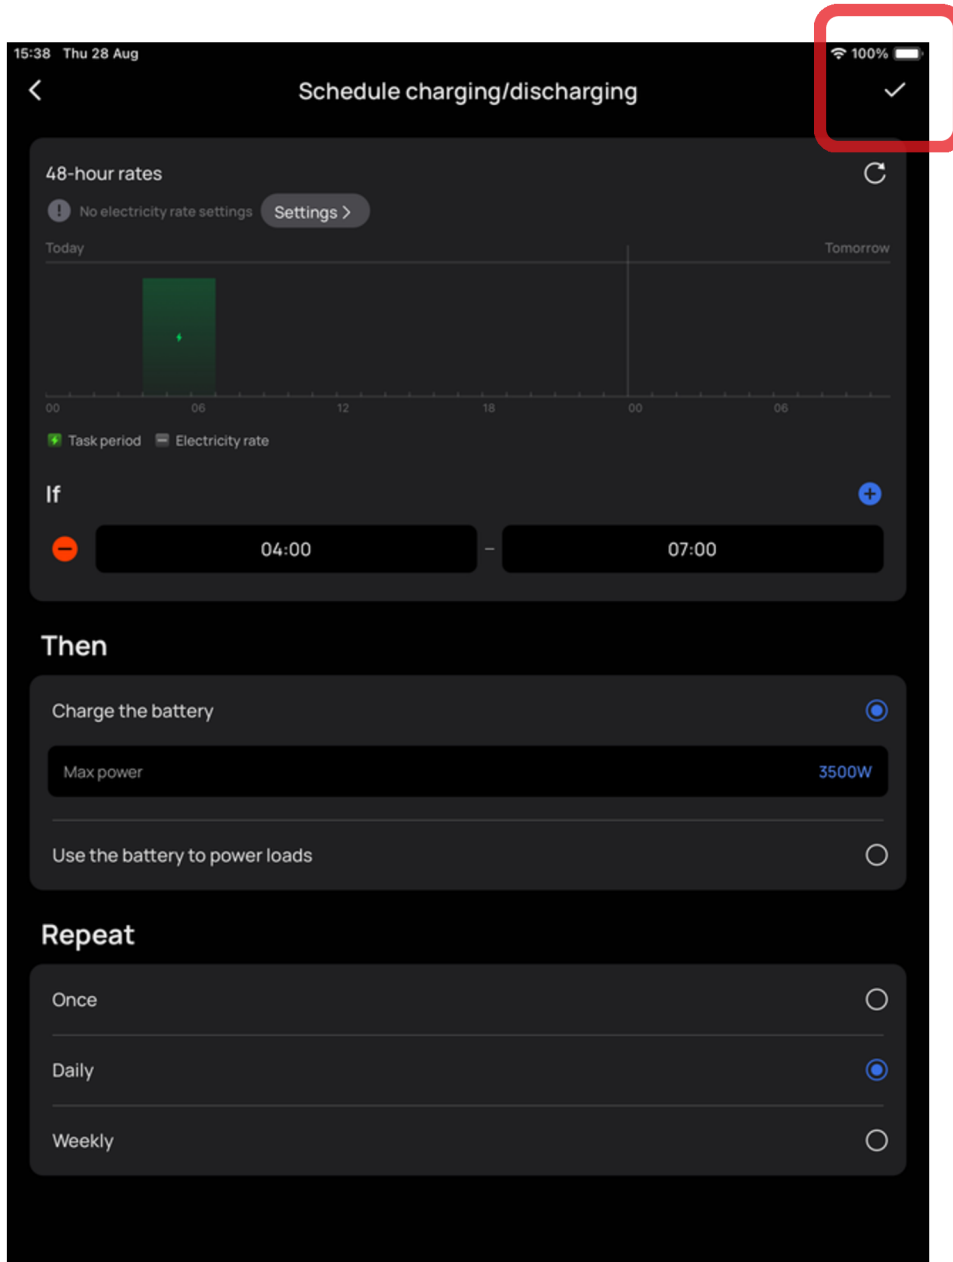

7. Then Click "Charge the battery" and select the max power of watts you want to charge the batteries at during that period. This will vary from person to person and make take some trial and error. Please feel reassured that the batteries will stop charging when they reach 100%. Contact a technical support administrator for further guidance.

8. Click on the "Repeat" section, to choose how often you want this charge to take place

9. to ensure that you have saved the setting, please click the tick in the top right hand corner of the screen

10. You should then be able to see this set on your “scheduled tasks” section! If you have any questions or concerns please email TSA@hsenergy.co.uk or phone 01444708252 and press option 2
